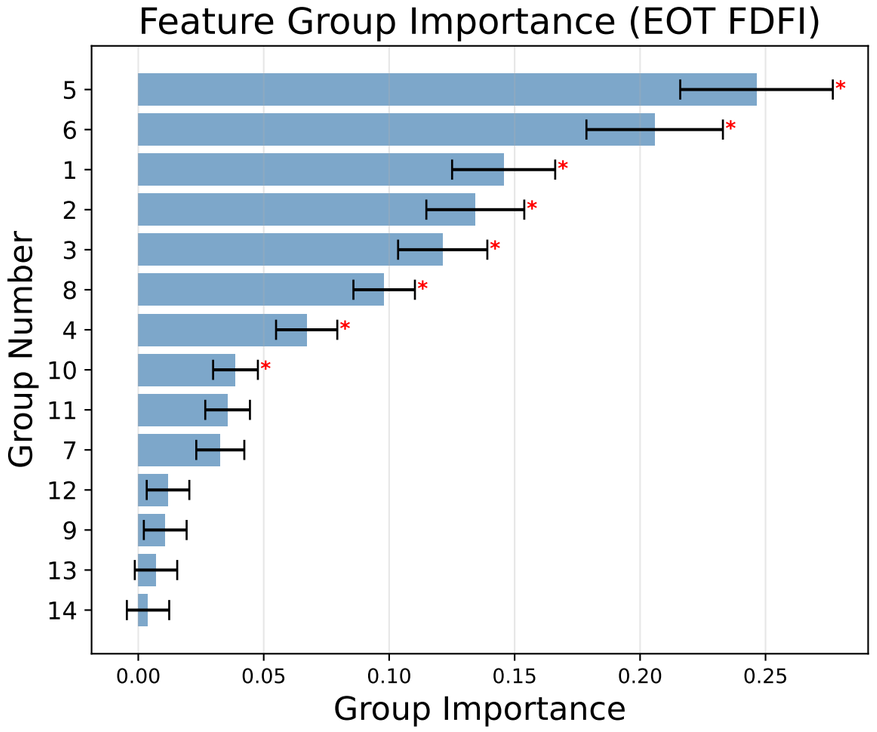
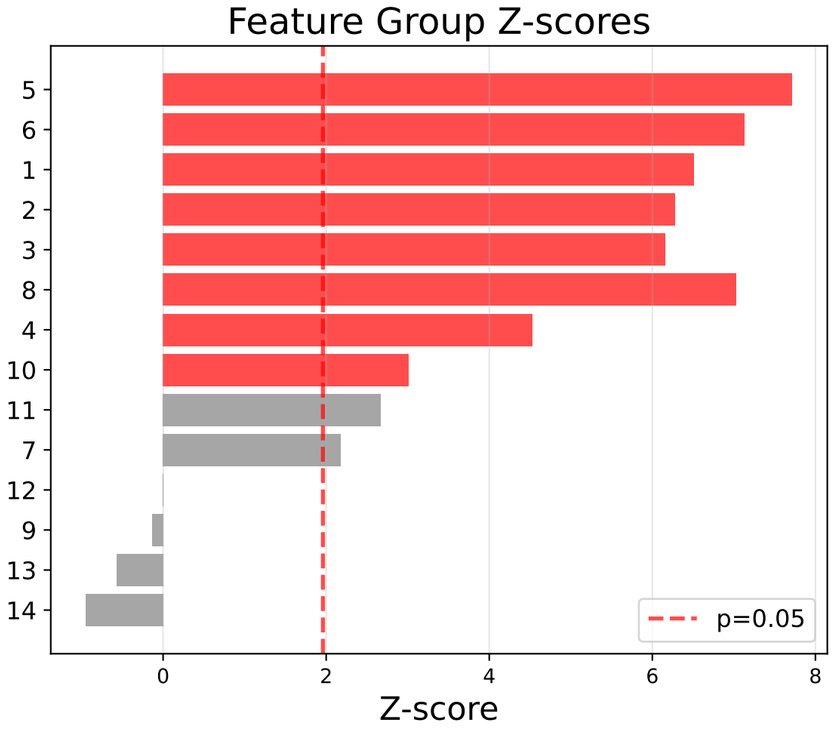
Sensitivity 50 (sens50) - EOT FDFI Group Importance





Feature Group Annotations

5. Sites with residues that covary with the VRC01 binding footprint
6. Sites associated with VRC01-specific potential N-linked glycosylation (PNGS) effects
1. VRC01 binding footprint
2. CD4 binding sites
3. Sites with sufficient exposed surface area
8. Sites for indicating N-linked glycosylation
4. Sites identified as important for glycosylation
10. Region-specific counts of PNGS
11. Viral geometry
7. gp41 sites important for VRC01 binding
12. Cysteine counts
9. Majority virus subtypes
13. Steric bulk at critical locations
14. Geographic confounders
